

Networking Gay Youth Websites

Last Updated Sunday, 24 October 2004

We work with websites to help bring content to gay youth accross the world. Associations like these are important for the success of both TheGYC.com and the websites with which it is assoicated.

Through networking with other youth or gay youth websites, we are able to bring our visitors high-quality content that will be useful to them. Also we can give visitors from other websites the advantages of The Gay Youth Corner.

Aims

We support gay youth websites in a number of ways, with the overall goal of keeping gay youth websites and the information on them...

- Available online 24/7
- Suitable and relevant
- Factual or representative
- Easy to access, free to access
- Helping to develop the usability of websites and standard of content
- Online as long as possible
- Known to you, our visitors

If you run a personal website or work on a website then we want to associate with you. We aim - as i'm sure you do - to bring people, websites and information together in a positive way. As a result there is so much more available online to gay youth because it is visible, accessable, usable and most important of all - the best.

How we help websites we are associated with..

Here is how we would love to help you without charge.We can offer these things to you only on request. Our associations are not elitist.

- We can give you advanced web hosting free of charge if you already have a domain name. This hosting is designed to hold lots of information, and for lots of people to view the information
- We can show you how to ensure your website comes up on website search engines, such as google
- We can help you in designing basic website graphic content, like a logo
- We can allow you to copy extracts of our website onto yours with prior permission
- We can add your web address to our links directory
- If you website is original we may be interested in writing about it, thus promoting it

Our associates have helped us, or can help us by..

- Allowing us to copy content from your websites onto ours with references made back to the originator
- Adding a number of links to our links directory
- Writing content for the website
- Adding photos to our website
- Linking to us
- Writing about us
- Recommending our website
- Including our chat room on their website
- Campaigning with us
- Sharing member information within an open network
- Securing our member-base by exchanging the computer information of badly behaved users
- Working on this website too by moderating content, users etc..The things that we can do together are not limited.

That's the great thing about the internet. But understand, we don't want to blend websites, making them all the same and equal in what they offer. Diversity is essential, diversity exists in the gay community and so the more diverse and the more different websites are in their concept and goals - the better!If you have an idea for gay youth website but don't know how to implement it then please get in touch. We don't set up websites or run courses in doing so, but we can show you how to do it within The GYC. Call it your own, manage your own project with the tools that we use to make The GYC work..

If you want to partner with us in order to achieve something for yourself, gay youth or your current website then contact us by clicking the link below.
